

The Wisconsin "No Call List" law does an OUTSTANDING job of protecting our phones from annoying telemarketer calls. However, there seems to be a move by some commercial interests to effectively weaken our state's law by petitioning the Federal Government through the FCC to mandate changes to that law. As a Wisconsinite who is very satisfied with our current law, PLEASE leave it alone! Commercial interests have numerous means of advertising their products and services including other communications media which the FCC governs.

Instead of weakening the Wisconsin law, how about taking it one step further and strengthen the Federal No Call Law!!!

Thanks, Mick Simmons
